

Solar System

Across

3. - Stream of charged particles emitted by the Sun.
4. - celestial body that orbits the Sun and smaller than a planet.
5. - Force that attracts objects toward each other.
6. - A luminous celestial object that generates light and heat.
8. - The plane of Earth's orbit around the Sun.
10. - Group of stars forming a recognizable pattern.
14. - Model with the Sun at the center of the solar system.
15. - Natural or artificial object that orbits a planet.
16. - A large celestial body orbiting a star.
18. - Region between Mars and Jupiter.

Down

1. - Planets with thick atmospheres, like Jupiter and Saturn.
2. - The path an object takes around another in space.
7. - Orbital motion of a celestial body around another.
9. - A planet that orbits a star outside our solar system.
11. - Planets - Rocky planets like Earth and Mars.
12. - Instrument used to observe distant objects in space.
13. - A cloud of gas and dust in space.
17. - A celestial object with a bright coma and a tail.
