

Water Cycle

Across

- 3.** - Area of land where all water drains into a common outlet.
- 7.** - Structure for conveying water over a distance.
- 10.** - Gathering of water in rivers, lakes, and oceans.
- 11.** - Underground layer of permeable rock that holds water.
- 12.** - Conversion of water from a liquid to a gas.
- 14.** - State when the air is holding the maximum amount of water vapor.
- 15.** - Release of water vapor from plants.
- 16.** - Flow of water over the Earth's surface.
- 17.** - Seepage of water into the soil.

Down

- 1.** - Movement of water through porous soil.
- 2.** - Process of removing salt from seawater.
- 4.** - Ability of substances to attract and hold water molecules.
- 5.** - Any form of water, liquid or solid, falling from the atmosphere.
- 6.** - Tiny water droplets or ice crystals in the atmosphere.
- 8.** - Process of water vapor turning into liquid water.
- 9.** - Change of water directly from a solid to a gas.
- 13.** - Scientific study of water and its distribution.
